

To find your City Council district online:

Go to [www.dallascityhall.com](http://www.dallascityhall.com)

On the left-hand column, under “Find,” click on “A Map.”

Then, you can get to your house one of two ways:

To navigate to your specific location, click on the map in the general area where you live. It will zoom in to where you clicked. Keep clicking until you get to your street, then click the button above “Query a Point” and click on a location near your house. It will tell you, for the spot where you clicked, all the details – City Council person, district, police beat, trash days... all kinds of useful information!

Or, you can enter an address. Sometimes (and in some browsers) the address entry blank doesn't work right, and you need to hit TAB several times to get to it. From the main “Find a Map” page, it should take 12 clicks. Enter the address and then click TAB and enter ZIP, then press return. It should pull the address up.
